

# [Working Draft]

## PsyWorld IRC Guide

Download Xchat.-WDK fra <http://xchat-wdk.org> eller fra følgende. link:  
<http://xchat-wdk.googlecode.com/files/XChat-WDK%201503%20x86.exe>

Installer Xchat og start programmet.

Du vil blive mødt af følgende dialogbox:

Udfyld 'Nick name' med dit ønskede brugernavn, second og third choice med variationer af dit brugernavn. Det er lige meget hvad du skriver under 'User Name' og 'Real Name'

klik nu på 'Add' og du vil se følgende diablogbox:

The image shows a dialog box titled "XChat: Edit Psychedelia". It has a standard Windows-style title bar with a close button. The main area is divided into several sections. At the top, "Servers for Psychedelia" contains a list box with "irc.psyworld.dk/7000" and three buttons: "Add", "Remove", and "Edit". Below this is a checkbox labeled "Connect to selected server only". The "Your Details" section has a checked checkbox for "Use global user information". The "Connecting" section has four checkboxes: "Auto connect to this network at startup" (checked), "Bypass proxy server" (unchecked), "Use SSL for all the servers on this network" (checked), and "Accept invalid SSL certificate" (checked). Below these are four text input fields: "Favorite channels:" (containing "#Psychedelia"), "Connect command:", "Nickerv password:", and "Server password:". The "Character set:" is a dropdown menu currently showing "IRC (Latin/Unicode Hybrid)". A "Close" button is at the bottom right.

Fyld alle felter ud og klik de forskellige boxes af, så det ligner ovenstående billede PRÆCIST, og klik derefter close.

The 'XChat: Network List' dialog box is shown. It has a title bar with the XChat logo and a close button. The 'User Information' section contains six text input fields: 'Nick name' (Online Navn), 'Second choice' (Online Navn 2), 'Third choice' (Online Navn 3), 'User name' (Random Brugernavn), and 'Real name' (meh). The 'Networks' section features a list box with 'Psychodelia' selected, and other networks like '2600net', '7-indonesia', 'AccessIRC', 'AfterNET', 'Aitvaras', 'AmigaNet', and 'ARCNet'. To the right of the list are buttons for 'Add', 'Remove', 'Edit...', 'Sort', and 'Favor'. Below the list are two checkboxes: 'Skip network list on startup' (checked) and 'Show favorites only' (unchecked). At the bottom are 'Close' and 'Connect' buttons.

Nu er Psyworld serveren tilføjet. Sørg for at markere 'Skip network list on startup' og klik connect.

Du bliver mødt af følgende dialogbox

The 'XChat: Connection Complete' dialog box is shown. It has a title bar with the XChat logo and a close button. On the left is a green sphere icon. The main text says 'Connection to Psychodelia complete.' followed by 'In the Server-List window, no channel (chat room) has been entered to be automatically joined for this network. What would you like to do next?'. There are three radio button options: 'Nothing, I'll join a channel later.' (selected), 'Join this channel:' (with an empty text input field), and 'Open the Channel-List window.'. Below these is a note: 'Retrieving the Channel-List may take a minute or two.' At the bottom left is a checkbox labeled 'Always show this dialog after connecting.' (unchecked). At the bottom right is an 'OK' button.

Afmarker 'Always show this dialog after connecting' og klik ok.

Du er nu forbundet til PsyWorld IRC og du har joinet kanalen  
#Psychedelia.dk

Fremover, forbinder Xchat automatisk til PsyWorld og joiner #Psychedelia  
når programmet startes.
